Sir:

AMENDMENT

Responsive to the Notice of Allowability dated May 6, 2004,  
applicant would like to make the following amendments:

IN THE CLAIMS

1(currently amended). A deadplate assembly for an I.S. machine  
which forms a parison into a bottle at a blow station and transfers  
the formed bottle from the forming station to a deadplate location,  
comprising

deadplate means comprising

a canister having a base at the bottom into which a  
formed bottle can be located.

a said base including air inlet means through which  
cooling air can blow into the canister, and

a cooling chamber for supplying cooling air to said base,  
means for supporting said deadplate means for displacement  
along a predetermined path, and

displacement means for displacing said deadplate means from  
the deadplate location to a second location.
